ASW 15
Technical Note
No. 23 - 1

Alexander Schleicher
GmbH & Co.
Segelflugzeugbau
D-6416 Poppenhausen

General: This Technical Note supplements TN no.23 dated April 21, 1988, LBA-approved April 26, 1988.

Subject: Inspection of the wing spar for wood-destroying mould fungi attack, to be accomplished by a specialist in the field of the mycology.

Serial number applicability: All ASW 15 and ASW 15 B serial no.s, including any motor-glider variants, for which - after accomplishment of TN no.23 of April 21, 1988 - an institute found heavy mould fungi attack on the wood cores and where the expert opinion report rendered recommends a further examination.

Compliance: The action under point 2.3 of this TN must be accomplished before March 1, 1989.

Action: 2.3 When the microscopical inspection of the wood cores (following TN no.23 point 2.1) showed heavy wood-destroying mould fungi attack of considerable extent, which calls into question the airworthiness of the glider / motor-glider, on recommendation of the mycologist and by request of the LBA another systematically controlled visual inspection of the spar must be done by a mycology specialist using an endoscope (in accordance with TN no.23, point 2.1).

If this inspection then shows no damage (by moisture and/or mould fungi attack) to the wood parts inside the spar which would affect the airworthiness, the spar inside must be preserved - unless already done - and closed again with the rubber stoppers (see TN no.23, point 2.2).

By that the glider is again airworthy without any restrictions.

If any damage affecting the airworthiness is found, the glider / motorglider is grounded until further notice and the LBA, Referat I 4, P.O.Box 3740, D-3300 Braunschweig, must be contacted.

Notes: 1. The inspection according to above point 2.3 must be done by a mycology specialist. There is a list of suitable institutes given hereafter. It is recommended that a competent person with knowledge of the subject (e.g. aviation inspector or repair station manager) is present during the inspection in order to assist the mycology specialist.

Zwischenhandlungen, verpflichten zu Schadenersatz. Alle Rechte für den Fall der Patenterteilung oder Gebrauchsmuster-Eintragung vorbehalten.
